Dance the night away

Mavericks

Guitar akkorder

Dance the night away (Mavericks)

INTRO:

```
E             B7         E     B7
Here comes my happiness again,
E             B7                   E     B7
Right back to where it should have been.
E                B7            E     B7
'Cause now she's gone and I am free,
E             B7            E   B7
And she can't do a thing to me.
```

CHORUS:

```
-------
E            B7               E   B7
I just wanna dance the night away
E         B7            E     B7
With Senhoritas who can sway.
E           B7               E       B7
Right now tomorrow's looking bright,
E             B7            E      B7
Just like the sunny morning light.
```

BRIDGE:

```
-------
    E             B7       E              B7
And if you should see her, please let her know
         E      B7         E     B7
That I'm well - as you can tell.
    E             B7             E            B7
And if she should tell you, that she wants me back,
         E      B7      E   B7
Tell her "No" - I gotta go.

I just wanna dance the night away - - - - - - - -

1 instrumental turnaround (8 bars horn section, 8 bars guitar solo)

I just wanna dance the night away - - - - - - - -

I just wanna dance the night away - - - - - - - - -  X 2

OUTRO: instrumental, 6 bars in progression, then:
```
