Overcome

Live

Guitar akkorder

```
F#m         E                          F#m
even now the world is bleedin'
           E                           F#m
but feelin' just fine all numb in our castle
                                                 E          F#m
where we're always free to choose never free enough to find
                      E            Bm
i wish somethin' would break cuz we're runnin' out of time

    A         E
and i am overcome
Bm             A        E
i am overcome
Bm                          A       E
holy water in my lungs
Bm         A         E
i am overcome

these women in the street pullin' out their hair
my master's in the yard givin' light to the unaware
this plastic little place is just a step amongst the stairs

and i am overcome
i am overcome baby
holy water in my lungs
i am overcome

F#m    D    A
so drive me out out to that open field
    E               F#m
turn the ignition off and spin around
         D                       A
your help is here but i'm parked in this open space
   E
blockin' the gates of love

i am overcome
i am overcome
holy water in my lungs
i am overcomed

beautiful drowning this beautiful drowning
this holy water this holy water is in my lungs

and i am overcome
i am overcome
```

i am overcome
i am overcome
