INTRO:
C Em F G 2x

VERSE 1:
```
C                     F
  Loose slips on ships
                    Am                        Em
I'm getting to grips  with what you've said
C                       F
  No it's not in my head
                 Am              G
I can’t awaken the dead  day after day
```

PRE-CHORUS:
```
F
  Why don't we talk about it?
G
  Why do you always doubt
     E                         Am
That there could be better way?
   F                           G
It doesn't make me wanna stay
```

CHORUS:
```
             C       Em
Why don't we break up
        F               G
There's nothing left to say
         C      Em
I got my eyes shut
F                  G
Praying they won't stray
             C       E
And when I'm sexed  up
F                                      F
That's what makes the difference to-day
                 C Em
I hope you blow a-way
```

INSTRUMENTAL:

VERSE 2:
```
 C                          F
 You say we're fattaly flat
                     Am              Em
Well I'm easily bored  is that o-kay?
C                          F
  Write me off of your list
                         Am             G
Make this the last kiss I walk a-way
```

```
F
Why don't we talk about it?
G
I'm only here don't shout it
E                          Am

Let's pretend we never met
