```
     G                C          G
I'm wondering if my thoughts of her
                        C          G
have ever crossed her thoughts of me
     Em                   D        C
and if they're half as clear as mine
     C       G/E       Am    D
and if there'll ever be a time

    G              C      G
for us to journey once again
                    C        G
as lovers and as trusted friends
      Em             D       C
what if the best is yet to come
     Bm       Am       Em         D       D7
and this was only the first part run

 G
get a hold of yourself
                          Bm
don't worry about the aftermath
Cmaj7                  Em
there is no one after you

or on your back

                          Bm

but the everyday just can't compete

with the beauty of a polariod
```

```
           Em          D        C
where the fairytale endures complete
        C        G/E     Am      D
and her eyes are always full of joy

        G                C      G
like a frozen glimpse of butterflies
      G            C      G
on a clourized celluloid sky
    Em                  D       C
she waves her cheerful last goodbye
    Bm       Am        Em            D       D7
and begs for me to let passed things slide

 G
get a hold of yourself
