```

(Verse 1)

```
            D                                          G
She was the worst looking woman to ever grace this county.

    A                                            D
And I's the loneliest man in the whole damn world.

      G                   A              D                    G
But I had me a fool proof plan, that I'd learned from my old man.

        D                      A             D
Yeah, I knew right soon she'd be my kind of girl.

      Bmin                                              A
Now I admit at first I didn't even want that woman near me.

      Bmin                                             A
Hell, she looked like she'd been beaten up with a rake.

         G                    A                   D          Bmin
But as I gulped down another round, I said, hey woman hand around.
```

```
           G                   A             D
Yer gettin better looking with every drink I take.

(Chorus)

      G           A         D
Cause I can drink any woman pretty.

G              A                    D
Just give me a bottle and a little time.

    G                A        D            Bmin
She may look like an ugly ole heifer right now,

    G                        A                       D      G A D
but one more round and that womans gonna look just fine.

(Verse 2)

        D                                            G
She was worse than Oprah Winfrey when I first met her.

        A                                      D
She had floppy ears and this big ole busted nose.

           G             A                   D                   Bmin
And it was kinda hard to ignore that woman's crooked and yellow teeth,

         G                 A                    D
and them sloppy ole smelly mismatched dimestore clothes.

    Bmin                          A
But Johnny Walker spiced up her wardrobe.

          Bmin                                     A
Yeah, and bourbon straightened out that busted nose.

       G               A               D                     Bmin
Well a couple of vodka shots, add in a little bit of dental work.

G                                       A          D    G  D
Next thing you know I'm sitting next to Marylin Monroe, oh no.

(Chorus)

    G                A        D            Bmin
She may look like an ugly ole heifer right now,
```

```
    G                        A                        D
but one more round and that woman's gonna look just fine.
```
